Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Action Summary

Acknowledgement is made of applicant's election of claims 20-28, without traverse, pursuant to examiner's restriction requirement, mailed July 21, 2003.

Claims 20-28 are active in the action.

Priority

Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. GB 0119052.9, filed on August 3, 2001.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 20-22, 27 and 28 are rejected under 35 U.S.C. 102(a) and (e) as being anticipated by Runge et al (US 6,261,598 B1). The claims are directed to a composition comprised of vitamin E, vitamin C, and a carotenoid. Runge teaches a composition comprised of vitamin E, vitamin C, taurine and a carotenoid mixture of beta-carotene, lycopene and lutein (column 1, lines 55-57 and column 2, lines 53-63). The referenced composition includes formulations in dry powder form (column 1, line 60), food supplement or animal feedstuff (column 4, lines 16-17).

Runge teaches every aspect of claims 20-22, 27 and 28. Thus, Runge anticipates the claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 20-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Runge et al (US 6,261,598 B1). In view of the 102 discussion above, Runge further teaches that the carotenoid mixture is present in amounts ranging from 0.1 to 40% by weight (column 2, lines 5-11). While the reference does not expressly disclose applicant's claimed amounts, differences in concentration will not support the patentability of subject matter encompassed by the prior art unless there is evidence

indicating such concentration is critical. Where the general conditions of a claim are disclosed in the prior art, it is not inventive to discover the optimum or workable ranges by routine experimentation. *In re Aller*, 220 F.2d 454, 105 USPQ 233, 235 (CCPA 1955).

One of ordinary skill in the art would have been motivated to manipulate the teachings of the cited prior art because it has been shown that formulations or compositions containing certain antioxidants help reduce the risk of certain maladies such as cardiovascular disorders and cancer. The expected result would be a formulation possessing enhanced preventative and cytoprotective properties.

Conclusion

No claims are allowed at this time.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- Schmitz et al (US 5,834,044) discloses a health food product containing an antioxidant mixture, vitamin C, vitamin E and curcumin; and
- Shields, Jr., et al (US 6,156,355) discloses breed specific formulations comprising chicken meat, rice, fiber sources, an antioxidant blend, vitamins, and carotenoids.
